IDENTIFIERS *Washington

ABSTRACT

A statistical overview is provided of trends in course enrollments and student characteristics in the Washington community colleges. The report considers data related to total course enrollments; full-time equivalent (FTE) enrollment in academic, vocational, and basic skills programs; state-supported FTE's by college; headcount and FTE enrollment in state-supported basic skills and developmental courses; enrollment trends in transfer and vocational programs from 1985 to 1989; on-campus FTE's by college; and percentages of full- and part-time faculty by college. With respect to student characteristics, the report looks at demographics, day/evening attendance, course area, and headcount by funding source. Highlighted findings include the following: (1) the Washington community college system served 96,779 FTE students in fall 1989, with 84,148 of them in state-funded courses; (2) fall 1989 headcount enrollment increased 2.6% over fall 1988, while FTE enrollment increased by 2.1%; (3) factors contributing to enrollment growth were a 2.1% growth in Washington's adult population, increased enrollment in traditional students under 25 years of age, and increased demand for developmental studies courses and training in allied health occupations; (4) the student population was 17% minority and 58% female; and (5) state-supported classes were taught by 3,658 full-time faculty. Tables comparing individual schools' state-supported courses, vocational activities, enrollments, and state and contract supported students are appended. (WJT)

FALL QUARTER REPORT

State of Washington

State Board for Community College Education

**Max Snyder, Chair
Earl Hale, Executive Director**

**Prepared by the Enrollment Planning and
Information Services Division
February 1990**

HIGHLIGHTS OF FALL 1989

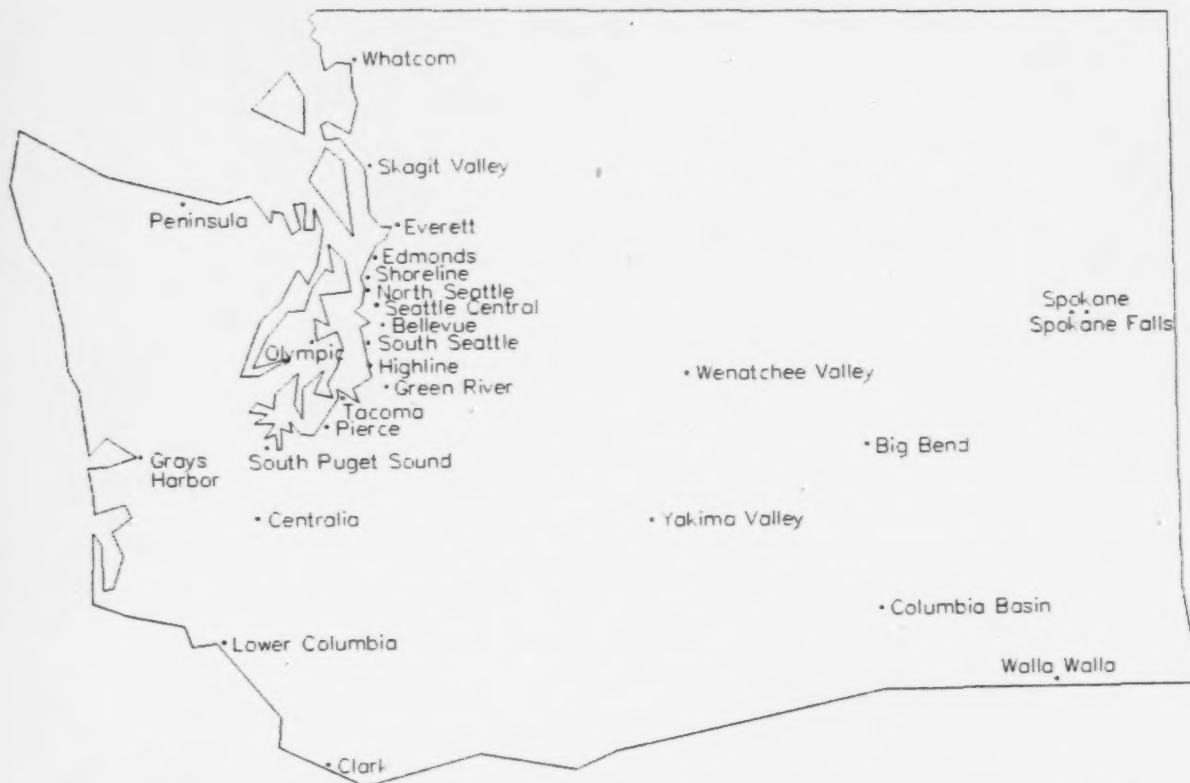

- The Washington community college system served 96,779 full-time equivalent students (FTEs) in Fall 1989, 84,148 of them in state-funded courses. FTE enrollment was 2.1 percent above the level of Fall 1988.
- Given the 84,500 FTE lid set by the legislature for state-supported courses in 1989-90, enrollment growth has been primarily limited to contract and student-funded courses rather than state-supported courses. Contracted courses had a 11.9 percent FTE growth and student-funded courses a 12.5 percent growth from Fall 1988 to Fall 1989. FTE enrollments in both were at an all-time high.
- State-supported FTEs grew 0.8 percent. State-supported FTEs comprised 87 percent of total FTEs, the lowest state-supported share in the system's history.
- The Washington community college system served 177,292 headcount students in Fall 1989, 134,775 of them in state-funded courses. Headcount enrollment was 2.6 percent above the level of Fall 1988.
- Enrollment growth resulted from:
 - Increased demand for community college enrollments related to the 2.1 percent growth in adult population in Washington.
 - Increased community college participation by traditional students under 25 years of age. Enrollment from that age group increased by 4.0 percent despite a 0.9 percent of that age group in the state population. (This is the "baby bust" population, born when birth rates started to decline dramatically.)

HIGHLIGHTS OF FALL 1989 -- Cont'd

- Increased demand for training in the allied health occupations. State-supported FTEs in allied health programs grew 3.7 percent.
 - Increased demand for developmental studies courses. State-supported FTE enrollment in these pre-college level courses grew 8.6 percent.
 - Increased enrollment by full-time students. Full-time students were 48 percent of the total enrollment compared to 47 percent in Fall 1988.
-
- The racial composition of the student population in Fall 1989 was very similar to that of the state as a whole (17 percent minority at community colleges, 13 percent in state population).
 - The student population was more female (58 percent) than the state's adult female population, typical of community colleges nationally.
 - State-supported classes were taught by the equivalent of 3,658 full-time faculty. Sixty-one percent of the teaching was done by faculty on full-time contracts.

WASHINGTON COMMUNITY COLLEGES

Washington is served by 24 community college districts, each governed by a board of five trustees appointed to five-year terms by the Governor with the consent of the Senate.

The State Board for Community College Education is composed of eight members, one from each district. The members are appointed to four-year terms by the governor with the consent of the Senate. The State Board is empowered to appoint an executive director who may employ a staff to carry out its responsibilities.

Board members are:

First Congressional District:
Marian May Gerstle, Seattle

Second Congressional District:
Barney Goltz, Bellingham

Third Congressional District:
Mitchell Bower, Jr., Vancouver

Fourth Congressional District:
Antonio Santoy, Yakima

Fifth Congressional District:
Max Snyder, Chair, Spokane

Sixth Congressional District:
Philip S. Hayes, Tacoma

Seventh Congressional District:
Joan Yoshitomi, Seattle

Eighth Congressional District:
Larry Sanford, Bellevue

**ENROLLMENT:
COURSE CHARACTERISTICS**

TOTAL COURSE EFFORT (FTE)
Fall Quarters 1985 thru 1989

The Fall Quarter 1989 full-time equivalent (FTE)* enrollment increased 2.1 percent over that of Fall 1988 to 96,779 FTEs. The legislature funded a 1.4 percent increase in state-supported FTEs this year over last. That was the first enrollment increase funded since 1985-86.

Most of the enrollment growth this fall was in contract and student-funded courses. State-support accounted for 87 percent of the total course effort, the lowest state-supported share ever.

FTEs BY FUNDING SOURCE
Fall Quarter 1989

FTEs in student-funded courses are at a record high level this Fall. Student-funded courses include avocational and personal interest courses such as micro-computers and personal finance. Contract-supported courses were also at an all-time high level. Contracted FTEs have grown substantially in the past four years as colleges attempted to meet enrollment demand with little or no increases in state funding.

* One full-time equivalent (FTE) enrollment is equal to one student enrolled for 15 credit hours a quarter.

**COURSE EFFORT BY ACADEMIC, VOCATIONAL AND
BASIC SKILLS/DEVELOPMENTAL STUDIES
STATE SUPPORTED
Fall Quarters 1985 thru 1989**

Total state-supported FTEs have grown by 2,000 in the past five years. The growth has primarily been in academic FTEs. Vocational FTEs were stable following several years of decline as trade and industrial programs that no longer served Washington's training needs were phased out.

**BASIC SKILLS AND DEVELOPMENTAL STUDIES COURSES
STATE SUPPORTED
Fall Quarters 1985 thru 1989**

Developmental studies courses which provide instruction in math, reading, and English below the college-level continued to grow rapidly. Enrollment increased from 5,342 FTEs in Fall 1988 to 5,815 FTEs in Fall 1989, an 8.6 percent increase. FTEs in basic skills programs remained stable or declined.

**BASIC SKILLS & DEVELOPMENTAL EFFORT -

NOTE: Totals may not add due to rounding.

* Growth in Developmental Studies FTEs in Fall Quarter 1988 included about 600 FTEs attributable to coding changes. Before Fall Quarter 1986, special needs courses such as those for the visually impaired and the developmentally disabled were included in other categories.

**ACADEMIC: TRANSFER AND VOCATIONAL SUPPORT COURSES
STATE SUPPORTED
Fall Quarters 1985 thru 1989**

Academic courses serve a variety of purposes. Students may enroll in them as part of a plan to transfer to a four-year institution, get a two-year associate of arts degree, to get support courses for a vocational certificate or degree, to gain specific knowledge from a single course, or for a combination of these reasons. Many vocational programs require students to take academic courses. Health occupations students, for example, are required to take various courses in the biological sciences.

**ACADEMIC EFFORT - STATE SUPPORTED
Fall Quarter 1989**

Fall Quarter 1989

A review of academic enrollment shows that 86 percent was in courses which apply to the "academic core" or "general education requirements" of the vocational and academic associate degree programs. These included communications, mathematics, humanities, social sciences, and natural sciences. The other 14 percent were in specific programs (e.g., business, engineering) or were electives.

**VOCATIONAL COURSES
STATE SUPPORTED**
Fall Quarters 1985 thru 1989

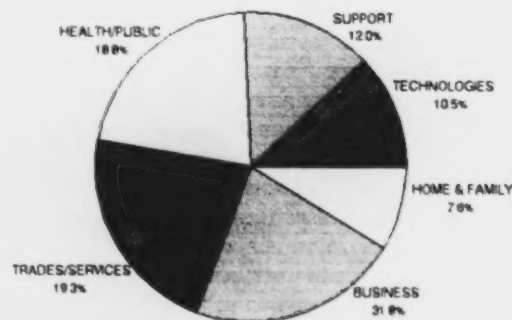

Community college vocational courses provide training and retraining for Washington workers. Transfer students seeking exposure to a career field also take vocational courses.

Business and office programs include secretarial, accounting, data processing, marketing, and banking programs. Trades and services include mechanics, repair, welding, construction trades, and food services.

Fall Quarter 1989

Enrollment in state-supported vocational classes ended its decline. The declines continued in business and office as more of these were offered as contract-supported or student-funded. Declines in trades and services enrollments were due to the phase-out of programs no longer needed because of the changing labor force. Allied health programs increased by 4 percent with the largest increases in dental hygiene (8 percent) and associate degree nursing (9 percent).

VOCATIONAL EFFORT - STATE SUPPORTED

**TOTAL VOCATIONAL ACTIVITY
STATE SUPPORTED
Fall Quarter 1989**

While the data on the preceding page indicates the nature of course effort, it does not indicate the total campus effort related to vocational education. The graph below shows the total state-supported vocational effort (47.9 percent of all state-supported FTE):

- FTEs in vocational classes (30,594 FTEs),
- FTEs in basic skills classes of a vocational nature (675 FTEs),
- FTEs in academic support and basic skills classes taken by vocational preparatory students (9,007 FTEs).

**FACULTY
STATE SUPPORTED
Fall Quarter 1989**

The equivalent of 3,658 full-time teaching faculty were in the classroom in Fall Quarter 1989.* In addition, 343 faculty including counselors, librarians and those on release-time, were employed. The Fall 1989 total faculty FTEF was 4,000, up 1.9 percent from the previous fall.

Full-time teaching faculty increased 1.8 percent and represented 61 percent of the total teaching effort.

Part-time teaching faculty give community colleges the flexibility to offer courses outside the expertise of full-time faculty, to offer more evening and off-campus courses, and to adjust course offerings quickly in response to student demand.

The average full-time equivalent faculty had 24.2 full-time equivalent students, up from 23.8 in Fall Quarter 1988.

NOTES: Part-time includes part-time, moonlight and contracted out effort.
Totals may not add due to rounding.

* One full-time equivalent faculty (FTEF) is equivalent to a full-time assignment for the quarter.

** Category included paraprofessional until 1988.

**ENROLLMENT:
STUDENT CHARACTERISTICS**

STUDENT ENROLLMENT AND DEMOGRAPHICS

Fall Quarter 1989

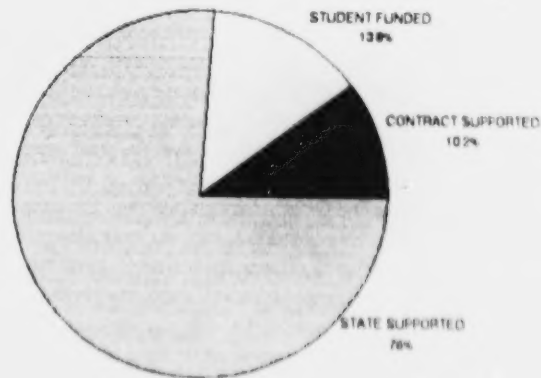

Washington community colleges served 177,292 students in Fall Quarter 1989. Enrollment grew 2.6 percent over the Fall 1988 level of 172,787.

Most of the growth was in contract and student-funded courses. Students enrolled in state-supported courses accounted for only 76 percent of the total, the lowest state-supported share in history.

Students by Sex

The pattern of female/male enrollment in Washington community colleges (58 percent female) was similar to that of community colleges nationwide (56 percent female). Women also constituted more FTEs than men (54.1 percent).

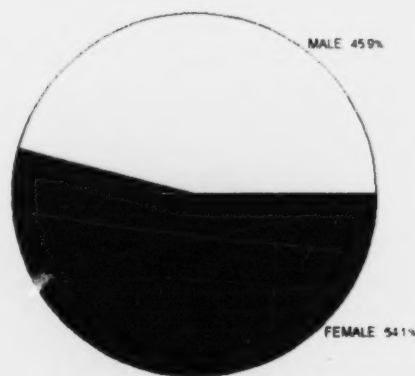

STUDENT HEADCOUNT BY FUNDING SOURCE
Fall Quarter 1989

STUDENTS BY SEX (HEADCOUNT)
Fall Quarter 1989

STUDENTS BY SEX (FTE)
Fall Quarter 1989

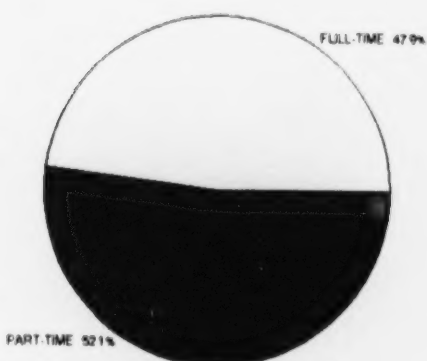

**STUDENTS BY FULL-TIME/PART-TIME STATUS
STATE AND CONTRACT SUPPORTED
Fall Quarters 1985 thru 1989**

The ratio full-time to part-time student has been fairly constant for several years, but in Fall 1989, the number of full-time students grew and the number of part-time students declined.

The average credit load of full-time students has been declining slightly throughout this decade. Part-time students take, on the average, four credits or about one course per quarter.

STUDENTS BY AGE -- STATE AND CONTRACT SUPPORTED
Fall Quarters 1987 thru 1989

While the age of the typical community college student has remained at about 28 for the past several years, there have been notable shifts in the size of specific student age groups. Between Fall 1988 and Fall 1989 the largest growth (5.2%) was among students 20 to 24 years of age. This growth occurred despite a small decline in the number of Washington residents in that age group (-.3%).

Total	145,433		151,421		152,821	
Median Age	27.9		28.0		27.7	

Younger students enroll for more credits on an average than older students. Thus, younger students make up more of the full-time equivalent (FTE) count.

Student Headcount by Age Group
Fall Quarter 1989

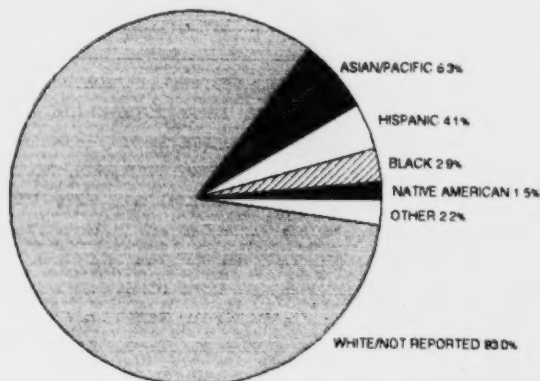

FTEs by Age Group
Fall Quarter 1989

**STUDENTS BY RACE
STATE AND CONTRACT SUPPORTED
Fall Quarter 1989**

Community college students reflect the racial diversity of the State of Washington. As the population has grown more diverse so has community college enrollment. Hispanic enrollment in contract-funded courses, especially English-as-a-Second Language, is very high (8.5 percent of contract students are Hispanic).

STUDENT HEADCOUNT BY RACE
Fall Quarter 1989

Race/Ethnic Group	Washington State Pop. 1989	Community Colleges Fall 1989
White/Not Reported	87.8%	83.0%
Asian	3.4%	6.3%
Hispanic	3.7%	4.1%
Black	2.8%	2.9%
Native American	1.5%	1.5%
Other	0.8%	2.2%

In English-as-a-Second Language (ESL) and Adult Basic Education (ABE) courses the percentage of enrollment by Hispanic and Asian students is greater than for other courses. Developmental courses (pre-college level) have a higher percentage of Black, Asian, Hispanic and Native American students than academic or vocational courses.

**NEW AND RETURNING STUDENTS
STATE AND CONTRACT SUPPORTED
Fall Quarters 1986 thru 1989**

Colleges have managed enrollments to stay within the FTE limits established by the legislature. At the same time, they have implemented programs designed to increase the retention of current students. These two forces have resulted in growth in the numbers of students returning to the community college from quarter to quarter and declines in the number of new students.

**STUDENTS BY DAY AND EVENING
STATE AND CONTRACT
Fall Quarter 1989**

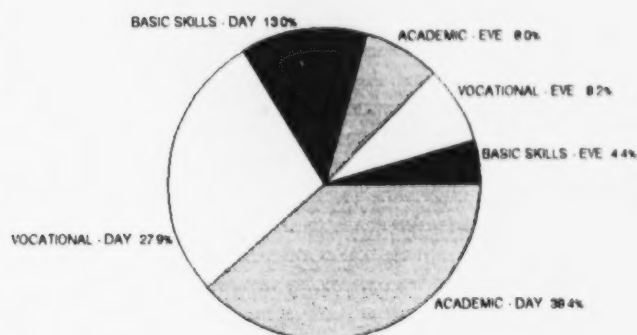

Nearly two-thirds of all students (96,875) enrolled in daytime classes only. Nine percent of students (15,261) enrolled in both day and evening classes. The remaining 40,685 students enrolled in the evening only.

Nearly half of the daytime FTEs were in academic courses in Fall Quarter 1989. Evening FTEs were about equally divided between academic and vocational courses. The typical daytime student was 26 years of age and enrolled for an average of 9.9 credits. The typical evening student was 29 years of age and enrolled for an average of 5.2 credits.

**APPENDIX:
TABLES BY COLLEGE**

COMPARISON OF STATE-SUPPORTED FTES
Fall Quarters 1988 and 1989

The four colleges with substantial enrollment declines between Fall Quarter 1988 and Fall Quarter 1989 (Seattle South, Yakima Valley, Spokane Falls and Edmonds) all made decisions to reduce their fall offerings to protect sequence courses offered in spring and winter quarters. Nineteen colleges had FTE growth and four others declined slightly.
